About

(Navigation bar)

DESCRIPTION

blogkaro.com

blogger.com is a blog site where bloggers come, create their account, post blogs and get famous together.

This site was designed and developed by a group of students from Shillong, Meghalaya as part of their Summer Internship Program(SIP) with software company **Codigion**.

Visit- <https://codigion.com/>

User can visit, read as well as comment on the post they read.

The UI has been designed by referring to many templates over the Internet.

*"We had fun designing this blog and we really thank **Sir Shiva** and the entire team of **Codigion** for their support and guidance. This won't have been possible without them."*

- Short description about the blog added and acknowledgement to the company also given along with a link of their official website.

A video game is an electronic game that involves interaction with a user interface or input device – such as a joystick, controller, keyboard, or motion sensing device – to generate visual feedback for a player. This feedback is shown on a video display device, such as a TV set, monitor, touchscreen, or virtual reality headset. Video games are often augmented with audio feedback delivered through speakers or headphones, and sometimes with other types of feedback, including haptic technology. Video games are defined based on their platform, which include arcade games, console games, and personal computer (PC) games. More recently, the industry has expanded onto mobile gaming through smartphones and tablet computers, virtual and augmented reality systems, and remote cloud gaming. Video games are classified into a wide range of genres based on their type of gameplay and purpose.

- Right below the featured comes the title of the blog.
- Towards the left, name of the author is mentioned along with a link which takes the user to the author's profile.
- Towards the right hand side is the section provided for social media platform using which the user can share the post with the world.
- After all this comes the main content of the blog which contains all the information the blog has. This is the main section of the blog.
